

RapidSet - Quick Start Guide

Overview

Allows quick and easy changing of the background and font colours, without having to go through the Screen Properties dialogs.

To Use

Background Colour

1. Click **Background Colour** to change the default background color.
2. Choose a color, or click **Define Custom Colours**
3. Click **OK**

Now you should see your new background color in the Chosen Preferences window, so you can preview your changes before you make them.

Font Colour

1. Click **Font Colour** to change the default font color.
2. Choose a color, or click **Define Custom Colours**
3. Click **OK**

Once you are happy with the way that the Chosen Preferences window looks, you can click **Apply Settings**. Now the Chosen Preferences window and the Current Default Colours window should match. You can now click **Exit** and use the settings you chose throughout Windows.

Restore Default Colours

Click **Restore Default Colours** if you want to undo any changes you might have made. This should change both of the preview windows to the original default colors of black and white font and background colors.
