The College of Health and Human Sciences will serve as a global leader in optimizing the health, well-being, and positive development of people and communities.

Optimizing health and well-being where we live, learn, work, and play.

Colorado State University’s College of Health and Human Sciences has focused on improving lives for more than 120 years, staying true to our roots in the disciplines of Home Economics and Professional Studies. Today, our academic programs are training the next generation of caring leaders prepared to generate creative solutions to some of the most pressing problems facing society. Passionate researchers are tackling complex challenges: combating obesity, promoting positive aging, optimizing sustainable design and construction, and enhancing physical, mental, and behavioral health and well-being. The College is committed to fostering connections to the community and providing close-knit learning communities, applied and theoretical research environments, and real-world outreach and hands-on opportunities for students.

Academic Units
- Construction Management
- Design and Merchandising
- Food Science and Human Nutrition
- Health and Exercise Science
- Human Development and Family Studies
- Occupational Therapy
- School of Education
- School of Social Work

VISION

The College of Health and Human Sciences will serve as a global leader in optimizing the health, well-being, and positive development of people and communities.
MISSION

With a commitment to the principles of equity and inclusive excellence, the College of Health and Human Sciences provides transformative academic, research, and outreach programs that promote the health and well-being of people, their environments, and communities in which they live.

OUR VALUES

We are committed to principles of equity and inclusive excellence in all that we do. These values guide our work in the College:

- Community Engagement
- Integrity and Social Justice
- Creativity and Discovery
- Teamwork and Collaboration
- Accountability
- Student-Centricity
- Innovation
- Entrepreneurship
- Centricty
- Excellence
- Respect
- Diversity
- Ethics
THE COLLEGE OF HEALTH AND HUMAN SCIENCES WILL:

1. Educate students with excellent communication skills who can solve real-world problems, intervene effectively, and enact change in their workplaces and communities while also being engaged citizens who operate with an innovative and entrepreneurial spirit.

2. Conduct translational research that identifies sustainable approaches to optimizing physical, mental, and behavioral health and the overall growth and development of individuals, families, communities, social organizations, and the built environment.

3. Through community-based outreach and engagement, promote learning, growth, development, and participation across the lifespan in all contexts of people’s lives.

4. Promote diversity, equity, social justice, and inclusive excellence by identifying, preventing, and intervening to address disparities in health and well-being and educational and social opportunity.

5. Improve individual and collective strengths in operations, management, and administrative communications to improve growth potential.
Educate students with excellent communication skills who can solve real-world problems, intervene effectively, and enact change in their workplaces and communities while also being engaged citizens who operate with an innovative and entrepreneurial spirit.

An emphasis on experiential learning is one of the hallmarks of the College of Health and Human Sciences. A focus on high-impact learning practices such as internships, hands-on labs, and international experiences ensures that student skills will have real-world relevance. Academic units will conduct curriculum review to confirm the College’s teaching follows best practices so that students achieve excellent job placement and preparation for graduate or professional school. Key initiatives include emphasizing cultural competence for students and implementing curriculum enhancements to improve retention and raise graduation rates.

### Strategic Objectives

1. Implement a cutting-edge, world-class curriculum that maximizes student success.
2. Maintain adequate advising support for all students, including academic success coordinators, to promote student success.
3. Optimize the role of non-tenure-track faculty to enhance focus on teaching excellence and decrease tenure-track faculty teaching loads.
4. Increase number of Graduate Teaching Assistants to strengthen graduate programs and help deliver innovative curriculum to undergraduate students.

1.1 Expand research footprint in key interdisciplinary areas such as aging, obesity, prevention science, and diversity and equity issues.
1.2 Conduct innovative research and creative scholarship that will improve health and teaching on campus, improve research activities and interventions, and inform social policy and industry standards.
1.3 Develop funding for a competitive pool of college-supported Graduate Research Assistants and research fellowships.
1.4 Support individual principal investigators and team-based scholarship and creativity.

Conduct translational research that identifies sustainable approaches to optimizing physical, mental, and behavioral health and the overall growth and development of individuals, families, communities, social organizations, and the built environment.

College of Health and Human Sciences researchers are looking critically at challenges facing our society in order to solve problems and positively impact the health and well-being of people. Whether the aim is to improve student learning through analytics, prevent substance misuse among adolescents, or evaluate sustainable design projects in the College are changing lives. Sustainable design, healthy aging, disease prevention, and positive development across the lifespan are all areas of focus for the College. Increasing the impact of research through growth of research expenditures, high-quality facilities, cutting-edge equipment, and research staff are priorities for CHHS.

2.1 Through community-based outreach and engagement, promote learning, growth, development, and participation across the lifespan in all contexts of people’s lives.

Increasing the impact of research through growth of research expenditures, high-quality facilities, cutting-edge equipment, and research staff are priorities for CHHS.

2.3 Support lifelong learning and distance learning opportunities.

2.4 Effectively translate findings from research and creative scholarship that will improve health and teaching on campus, improve research activities and interventions, and inform social policy and industry standards.

2.5 Develop funding for a competitive pool of college-supported Graduate Research Assistants and research fellowships.

3.1 Effectively translate findings from research and creative scholarship that will improve health and teaching on campus, improve research activities and interventions, and inform social policy and industry standards.

3.2 Support lifelong learning and distance learning opportunities.
Promote diversity, equity, social justice, and inclusive excellence by identifying, preventing, and intervening to address disparities in health and well-being and educational and social opportunity.

The College of Health and Human Sciences emphasizes a caring and supportive community where everyone’s contributions are valued and all voices are heard. The College has the goal of increasing numbers of diverse faculty, staff, and students and creating a welcoming and inclusive climate. Offering a multi-cultural curriculum with training in cultural competence will result in alumni who are qualified to succeed in our diverse world. The College will support expanded research opportunities in issues of inequity and social justice to further our intention of improving lives for all people, including the underserved and underrepresented.

4.1 Use and expand efforts and resources to strategically recruit high-achieving, diverse students, faculty, and staff.

4.2 Infuse curriculum with diversity content.

4.3 Increase research that addresses issues of inequity in health, education, and other issues related to social justice.

4.4 Promote a welcoming and supportive environment for all faculty, staff, and students.

4.5 Provide ongoing professional development and training on diversity and inclusion.

5.1 Enhance and increase quality and quantity of facility space to meet the needs of the units.

5.2 Prioritize creation and maintenance of healthy workspaces.

5.3 Prioritize appropriate staffing levels to meet college and unit day-to-day administrative functions.

5.4 Increase and enhance communications with key audiences and constituents.

5.5 Integrate development, communications, and college and unit activities.

5.6 Acquire and maintain appropriate technology to support the needs of faculty, staff, and students.
