

JACQUELINE SANCHEZ

# hotel DFRNT

LOCATION: SANTA FE, NM

Hotel DFRNT is much more than a beautiful hotel. It is a masterpiece based upon the enchanting traditions, culture, and experiences of New Mexico. No other state has such rich culture, roots, history and artistic taste like that of New Mexico. However, there are a lack of hotels that have risen to meet the aesthetic needs of the traveler and the entertainment needs of the locals. Hotel DFRNT is a large scale re-design of the current Eldorado Hotel located in Santa Fe, New Mexico. This hotel will take the historical and authentic architectural features from the existing building and develop a modern and exciting attraction for Santa Fe. The hotel attracts those desiring a to experience Santa Fe, also known as "The City Different" in a more modern and present day interior environment. The intent of hotel is to create a modern boutique hotel that features a coffee shop, art gallery, authentic New Mexican restaurant, spa, meeting room, fitness center and outdoor placita.

THE DESIGN concept is based on mixing the old parts of New Mexico that make it unique, quirky, and authentic while translating it to a new contemporary experience. The building will be founded upon the new and the old, what was and what will be. The past and the present. The traditions and the brand new. The concept of tradition encourages the slower and family oriented lifestyle focusing the layout of the building around the placita, an outdoor courtyard. The spaces will be oriented around the placita, acting as the heart of the building. The lobby and layout of the building will be designed to encourage visitors to stop and experience the enchanting and intimate character of New Mexico.
