

SARA WINTERBURN

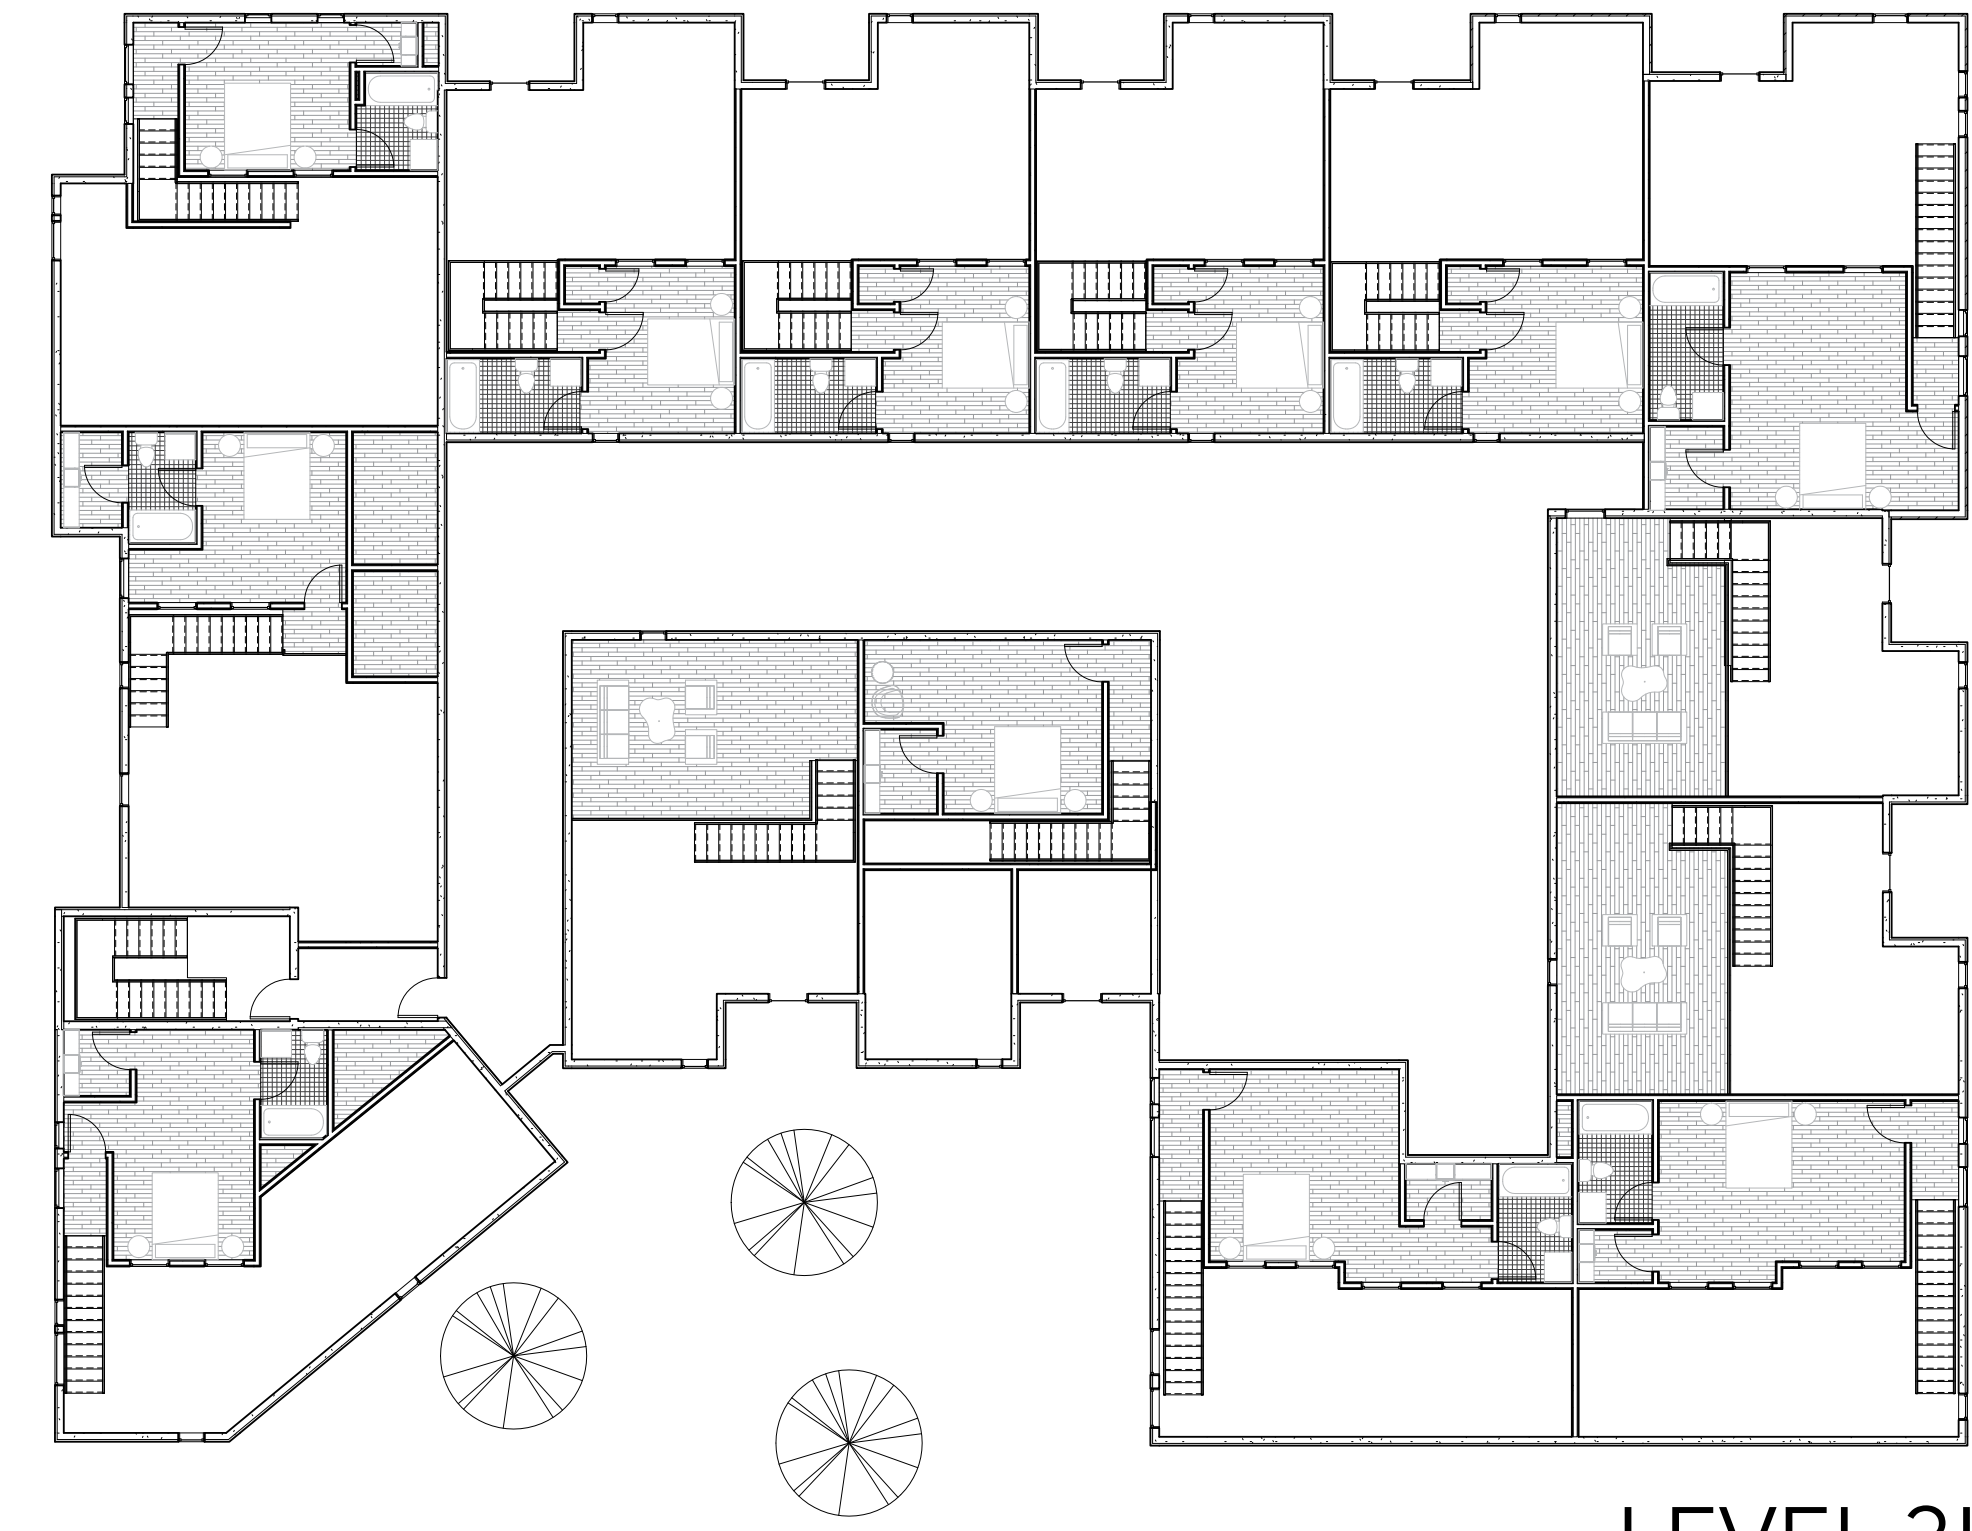

LOCATION: Denver, Colorado

Spectrum is a housing development for people with ASD and others that may need this sort of comfort and care. Most of the spaces use color theory to better suit the occupant to the space. The most used color in this instance is green as it naturally has calming affects for those with ASD.

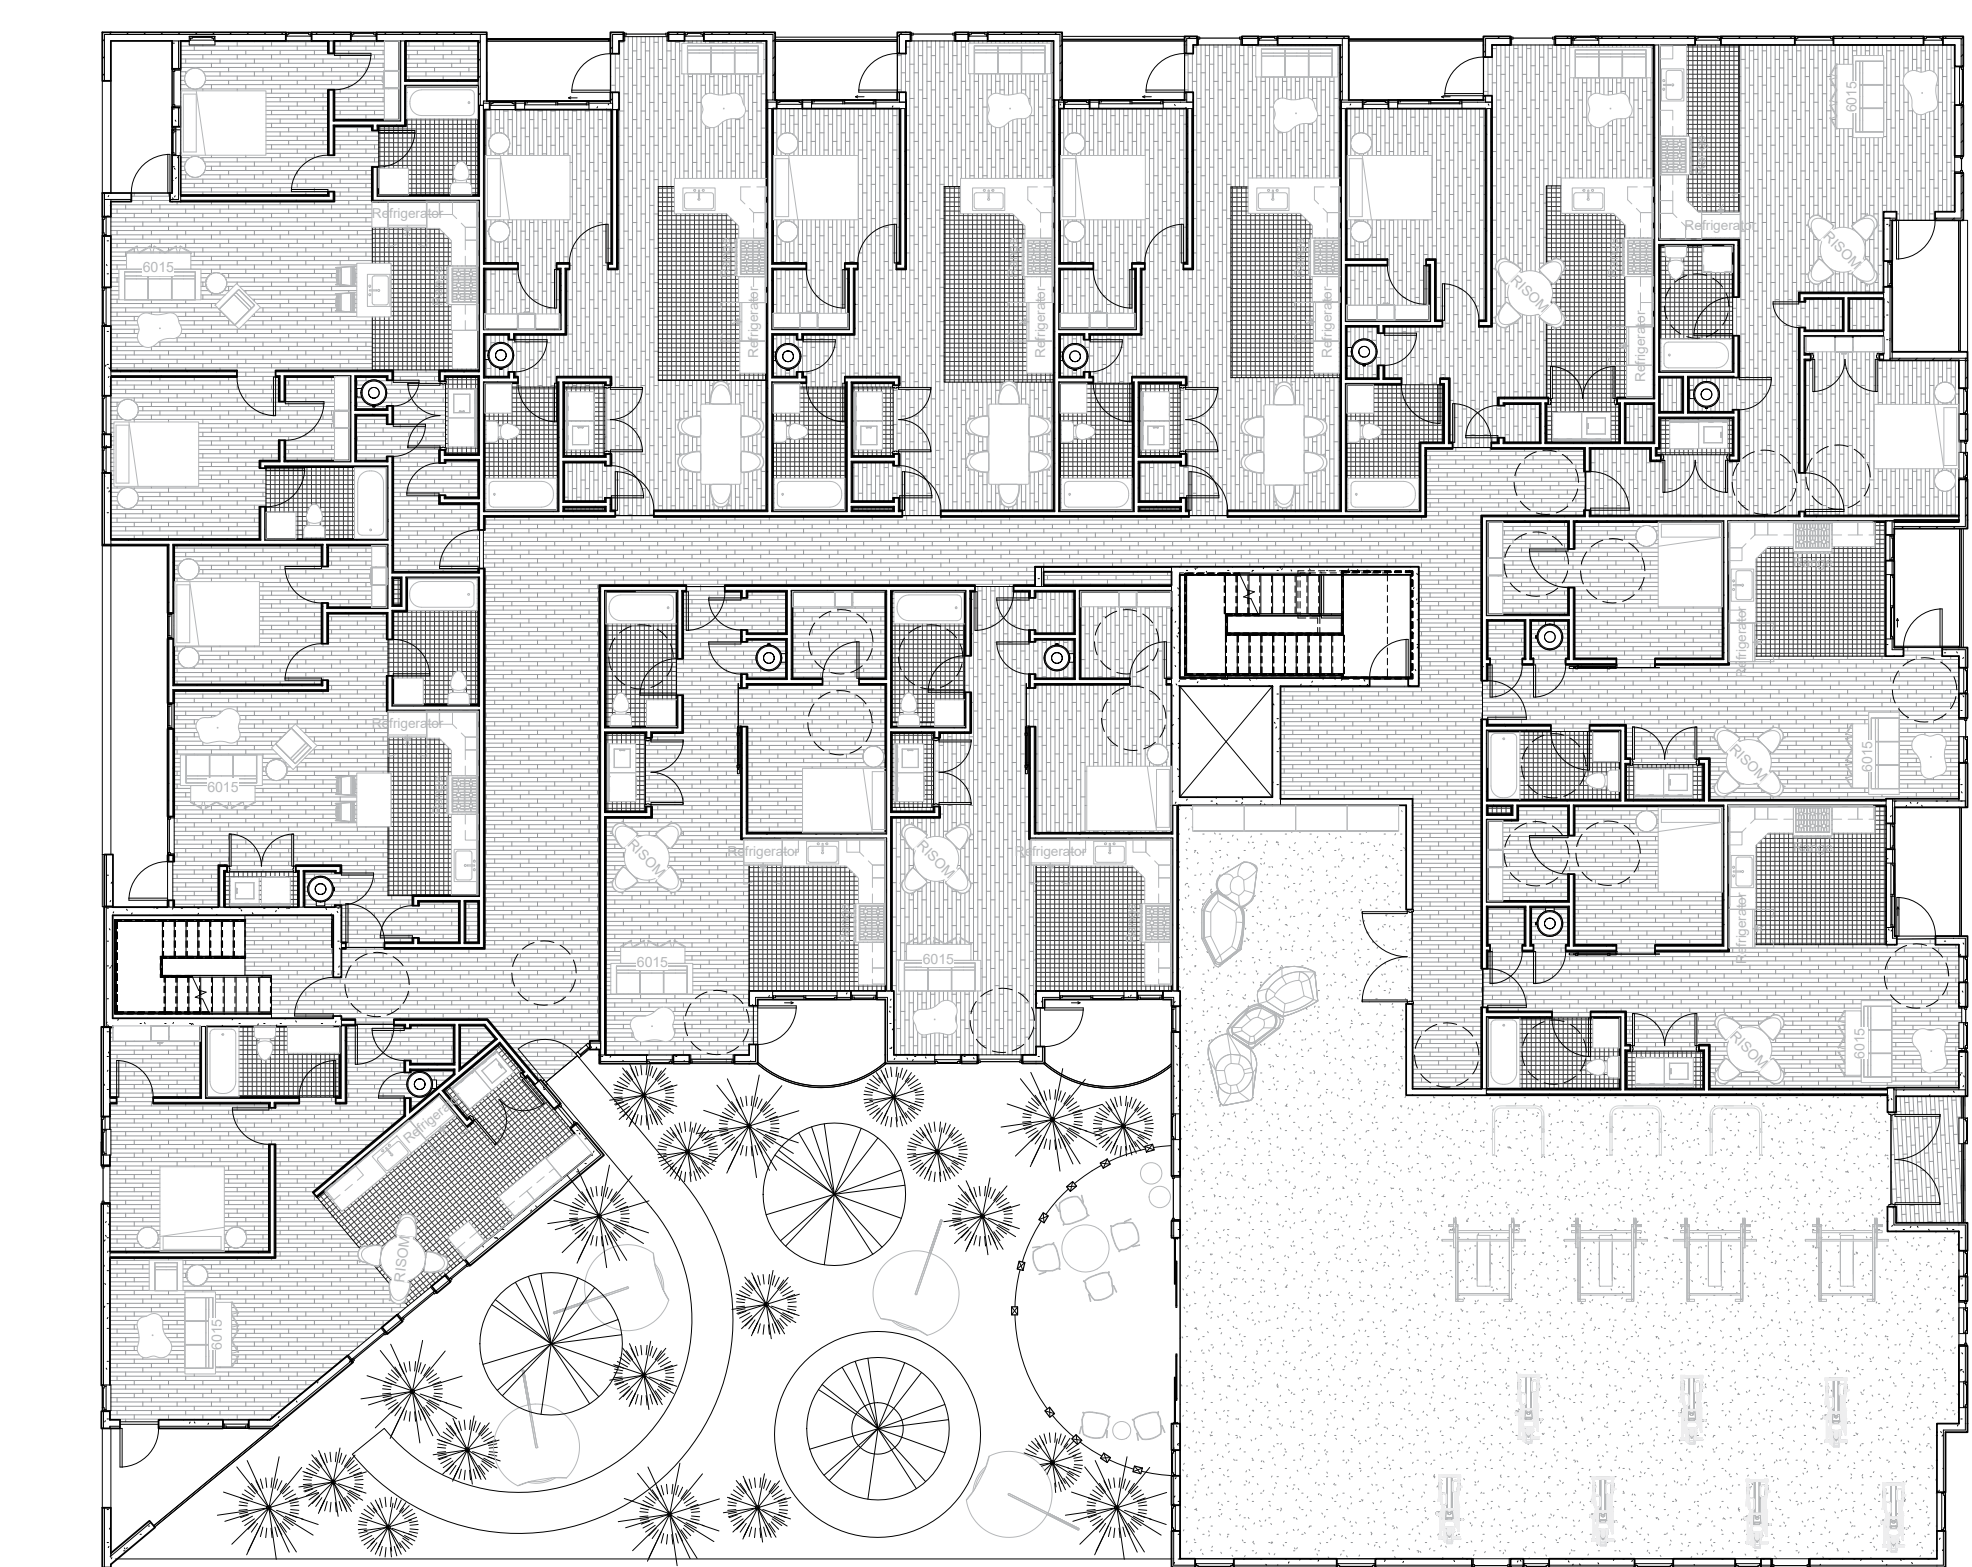

The building is structured so that as you get closer to the top of the building it gets brighter and more open as you enter the residential spaces. The bottom floor focuses on everyone as there is a supermarket as well as a multi-purpose health center to aid in the mental and physical health of the residents
