WHAT WE DO

The Developmental Disabilities Research Laboratory uses developmental science to study how people with differing abilities learn and grow. We ask questions about areas of strength and vulnerability, and how to identify children who are at risk for additional diagnoses.

We are currently conducting a variety of studies designed for people ages 2.5 to 29 years. Interested in learning about more opportunities? Please call us or send us an email!

WHAT TO BRING TO YOUR VISIT:

If you or your family member uses any of the following items, please feel free to bring them to your visit:

- AAC device (if using) 
- Glasses 
- Hearing aids 
- Comfort items
- Comfortable clothes/shoes 
- Food and drinks for snack breaks
